## WORK EXPERIENCE

---

### Senior Software Developer

Oct 2019 - Present

*The Home Depot Canada, Toronto, ON*

- Build and maintain re-usable components consumed by multiple Angular projects
- Collaborate with several teams to solve problems - including UI, mobile, backend, and product
- Write clean and organized documentation for architectural designs, features, standards, and guides
- Present and demo successfully deployed projects to both a technical and non-technical audience
- Boost Home Depot's website performance by removing redundancies, decreasing bundle size, improving load events, and updating dependencies
- Improve Home Depot's store localization flow to more accurately assign user's to their nearest store
- Implement solutions to automate manual work flows that sped up the process and eliminated human errors

### Software Developer

Jun 2017 - Aug 2018

*Reportin, Toronto, ON*

- Implemented an automated test strategy for Reportin's API on .NET Core, increasing test coverage by 87%
- Independently created an admin panel for a product waitlist that allowed the marketing team to modify UI and email templates
- Built an interactive Telegram bot integrated with our waitlist API encouraging social engagement of Reportin's platform
- Incorporated an Agile workflow using Jira and daily scrum meetings

## PROJECTS

---

### Warmains *AngularJs, Node, MongoDB, Express*

<https://github.com/c3mohamn/warmains2>

A character planning tool for World of Warcraft that allows players to simulate in-game gear, stats, and ability combinations in order to optimize their character's performance in game. Mimicked user interfaces, complex formulas, algorithms, and game mechanics from within the game onto a website.
