EDUCATION

Sept 2013 – April 2019 **Bachelor of Science in Computer Science, University of Toronto**

EXPERIENCE

June 2017 – August 2018 **Junior Software Developer, Reportin (now Source)**

- Implemented an automated test strategy for Reportin's API using xUnit
- Integrated external APIs such as Twitter, Intercom & Sendgrid
- Independently created an admin panel for our waitlist using Angular 6
- Prepared presentations outlining research & progress for major tasks
- Kept track of tasks using Jira & took part in daily scrum meetings

PROJECTS

April 2017 – Present **Warmains, Personal Website**

- Created a shareable character development tool for World of Warcraft
- Built from the ground up three times, each time significantly improving tech stack and design – all available on Github and hosted on Heroku

Winter 2019 **Office Hour Scheduler, Engineering Large Software Course**

- Created a web app using the MEAN stack with five other students
- Adopted the Gitflow model and an Agile workflow
- Major contributions included authentication & front-end Angular testing

SKILLS

Languages **Java, C/C#, Python, JS, TS, HTML, CSS, SQL**

Software **Git, Jira, Visual Studio, Azure, Postman**

Other **Angular, React, .NET Core, Node, Travis CI, Redux, Foundation, Bootstrap**
